Work Experience

Frontend Developer / Instructor

Tech Studio Software Academy | May 2021 - Nov 2021

- Working with a client to help improve the development experience by setting up CI/CD enablement and a content management system.
- Collaborated excellently with peers and stakeholders in fast-paced distributed team.
- Responsible for building and deploying interactive web application using front end technologies.
- Teaching and mentoring coding student to become professional software engineers.
- Recording tutorial videos on algorithm, this helps student develop a problem solving mindset.

Ecommerce Store.

<https://Fabstore.org>

- Creatively designed and solved algorithm that allows users to create, update and delete.
- Calculatively summed up total purchases in customers cart depending on unit price.

Football Live Score.

<https://fabscore.netlify.app>

- Creatively sourced vital data by writing dynamic REST API route that chained queries to football api for match update and live match data.

Note.

I am willing to do a none paid probation period just to make sure that i produce a positive return on investment for the company.
